SANJAY MITTAL

Python Full Stack Developer | AWS Cloud & Infrastructure | Backend Development | SQL

+91 9986744631 sanjaymittal.p2032005@gmail.com https://www.linkedin.com/in/sanjay-mittal-a3a592385/
Bengaluru, Karnataka, India

EXPERIENCE

Full Stack Development Intern
Excpert Technologies Private Limited

27 Jan 2026 - 10 Mar 2026

- Worked across the frontend, backend and database layers of web applications as part of a full stack development internship.
- Gained hands-on exposure to how user interfaces, server-side logic and database storage connect in a working application.

EDUCATION

Bachelor of Computer Applications (BCA)
New Horizon College

2026 Bengaluru, India

- CGPA: 8.06

PROJECTS

PetVerse AI – Veterinary Appointment Management System
Technologies: Python, HTML, CSS, JavaScript, MySQL

- Built a web application for booking and managing veterinary appointments, with a scheduling workflow for pet owners.
- Implemented a medicine-related chatbox for pet-care queries and video-call functionality for remote consultations.
- Used MySQL to store and retrieve appointment and related application data.

Mittal Bags – Luxury Bag E-Commerce Web Application
Technologies: MySQL, HTML, CSS, JavaScript, XAMPP, Visual Studio Code

- Developed a full stack e-commerce application with user login, a user dashboard, bag listings and purchase flow, and an offers section.
- Built an admin panel for back-office management of the store, applying CRUD operations against a MySQL database.
- Developed and tested in a local XAMPP (Apache, MySQL) environment using Visual Studio Code.

AWS EC2 Monitoring Lab – Hands-on Lab
Technologies: Amazon EC2, AWS IAM, Amazon CloudWatch, CloudWatch Agent

- Configured an IAM role and policies so an EC2 instance can send monitoring data to Amazon CloudWatch.
- Set up the CloudWatch Agent and monitoring configuration, and reviewed instance metrics in CloudWatch.

TRAINING / COURSES

AWS Cloud Training
Besant Technologies

AWS cloud computing training with hands-on labs in EC2, IAM and CloudWatch. Training course, not an AWS certification.

SUMMARY

BCA graduate (2026, CGPA 8.06) with a foundation in Python and JavaScript web development and MySQL database design. Completed a Full Stack Development internship and built three projects: a veterinary appointment system, a MySQL-backed e-commerce application and a hands-on AWS EC2 monitoring lab. Studying AWS through Besant Technologies, with practical lab work in EC2, IAM and CloudWatch. Seeking an entry-level Python Full Stack Developer, Python Backend Developer or Junior AWS Cloud Engineer role.

KEY HIGHLIGHTS

Academic Performance
Completed BCA (2026) with a CGPA of 8.06 at New Horizon College, Bengaluru.

Full Stack Projects
Built a veterinary appointment system and a MySQL-backed luxury bag e-commerce application.

Hands-on Cloud Labs
Configured an IAM role and CloudWatch Agent monitoring for an Amazon EC2 instance.

Internship Experience
Full Stack Development Intern covering frontend, backend and database work.

SKILLS

Programming
Python JavaScript SQL

Frontend
HTML5 CSS3 JavaScript responsive design fundamentals

Backend & Databases
Python backend development MySQL relational database design CRUD operations
